

Tree of Life – Motif

A very popular motif in Bauernmalerei has been the "Tree of Life". You can find it in many different varieties. I base coated the inside panel with an antique white and used patina for the antiquing. First apply the leaves and then flowers, birds, etc. Flowers, heart and birds are painted in a wet on wet technique. Blend shadings and overstrokes in a slightly moist base. If you need more info about Bauernmalerei-flower painting and antiquing, our books and CD's will guide you with a step by step instruction through the painting process.

Print drawing and enlarge or reduce it as needed.
